

# Installing Styles

## Installing Layer Styles in Photoshop Elements 11

### Install a Layer Style

- In the Effects panel, click on the Styles icon.
- Click on the flyout menu and choose Load Styles.
- Navigate to a style on your computer and click Open. The new layer style will be added to the Styles drop down menu.

### Apply a Layer Style

- In the Layers panel, activate a layer you'd like to add a layer style to.
- In the Effects panel, click on the Styles icon.
- In the drop down menu, double click on a style to apply it to your layer.

### Delete a Layer Style

- In the Effects panel, click on the Styles icon.
- Click on the drop down menu and choose the style you'd like to delete.
- Click on the flyout menu and choose Delete (style).
